 **Hi there. Thank you for contacting The New York Times' Account Management Team. This is << Andres >>, and I'll be glad to help! Before we proceed. How can I assist you?**

Hello, I would like to report a bug I found. Is there an official email or another channel to report technical issue?

 You can report it through this channel. Please let us know and thank you...

I found that premium article (reserved to paying users) are still available for regular users.

It is possible to access the whole content of a premium article by inspecting the component `Li` and accessing the value of the object `'\$r.props.asset.sprinkledBody.content'`.

#### Setup

- Having React Dev Tool installed (<https://chromewebstore.google.com/detail/react-developer-tools/fmkadmapgofadopljbjfkapdkoienihi>)
- Having a regular account (no premium)

#### Step to reproduce

- Open a premium article. A paywall will appear
- Inspect the component tree and locate the component responsible for showing the article (`'Li` in the attached screenshot)
- Access the full article text with `'\$r.props.asset.sprinkledBody.content'`.
